

IIR SEEKER

IMAGING INFRARED SEEKER FOR HISAR AIR DEFENSE MISSILES

IIR SEEKER

IMAGING INFRARED SEEKER FOR HISAR AIR DEFENSE MISSILES

Main Features

- Operation Under High Acceleration and Vibration
- High Performance Under Dome Heating
- Long Range Target Detection
- Genuine Target Tracking Algorithms with High Processing Capability
- Athermalized Optics
- Wide Field of View (FOV)
- Wide Field of Regard (FOR)
- High Resolution Cooled Infrared Detector

Advantages

- Short Start-Up Time
- High Precision
- High Reliability and Low Life-Cycle Cost
- Modular Design
- MIL-STD-810 G Compliant
